

# The RPA & Intelligent Automation Journey

## Assess

Assess the organization's readiness to use RPA/IA. Identify transitional steps.

## Discover

Understand current processes and inventory automation candidates.

## Streamline

Model the target state and streamline the selected tasks *before* automating them.

## Engage

Affect cultural change in cooperation with stakeholders through training and centers of excellence.

## Build

Select, install, and configure appropriate tools for the enterprise's long-term needs.

## Manage

Deploy and optimize within the environment. Provide analytical output of automation landscape.

## Scale

Incrementally expand the scope and/or volume of RPA/IA implementation.

### Rapid Adoption

Of Changed Processes and New Tools

### Quick ROI

By Starting Small with the Best Candidates

### Broad Impact

With Clear and Desirable Outcomes

In a pilot for a financial institution, our business process analysts identified a time consuming, repetitive process for which robotic process automation (RPA) was the best solution. In just two weeks, RPA freed one full-time employee and reduced the time to outcome from 3 hours to just 1 minute.

## REAL-WORLD BENEFITS OF AUTOMATION

### Process Led, Technology Enabled.

BRMi does things right the first time. We approach automation as part of *business process optimization*, not as just another technology addition. Our RPA/IA implementations can support a wide variety of functions in your organization, including:

Benefits  
Administration

Finance & Accounting

Human Resources

Supply Chain  
Management

Procurement

Correspondence  
Management

User Account  
Management

IT Support

As process experts, we will determine where an RPA/IA solution will make the most sense and be better prepared for implementation by our certified technical experts. BRMi's approach sets an organization on its way to *faster cycle times, reduced errors, increased customer satisfaction, and lower service delivery costs.*
